PUBLISHER COLLABORATION

World of Warships

World of Warships is one of the biggest Naval Videogames worldwide, with a target audience of 26+ years old Males. Making an OMEN Custom Made PC or a HyperX product, with a World of Warships theme, can increase sales to that target audience while also enabling the Game's Publisher to increase community engagement.

UBISOFT

Ubisoft is one of the leading Video game publishers, with more than 90 studios and known as the creator of the Assassin's Creed Franchise. A collaboration with such a publisher will increase community engagement.

PRESS EVENTS

Press Events throughout the year will increase media exposure and connections with the Press. In that way, there will be opportunities for better prices in media buying and advertising.

What's Included:

- Custom-made Booth Proposal for both brands
- Project Management
- Budgeting & Implementation
- Modular Booth Creation Standards
- Yearly Booth Project

THE COST IS BASED ON CUSTOMER NEEDS AND BUDGET

We target to create a co-branding booth of OMEN and HyperX that will be modular and we'll be able to use in multiple events around the year. This way, we minimize customization and creation costs by at least 30%.

Products

Showcasing Products & Distribution

ELLINBIO IKE Established 2016

VISION

Our vision primarily focuses on providing the appropriate value in the identity of Greek Agricultural products, in order to prove their stability and uniqueness to the Global Market.

MISSION

By targeting to a global level of degree, we focus on high-end consumers - partners who value our products and additional services. Wood Customization is absent for the market, so we fill that gap with high-end and precise wood craftsmanship through visualization.

KEY SELLING POINTS THE STORY BEHIND

1 VISUALIZATION

We *visualize* how the product and its content, can be both unique and appealing to the customer.

2 HANDMADE

All of our products are *handmade*.

3 PROCESS

We evaluate the way nature created the wood, so it is carved accordingly, leading to a final product with all *in respect to nature*.

4 FINALIZATION

The final product is a combination of class A Virgin olive oil and a uniquely crafted bottle, from the material, it was *born* from.

With our products, we embrace creating something new with respect to the environment.

OUR FUTURE PLANS OF EXPANSION

Our goal is Greek products to reach every corner of the earth. We have both the inspiration and the way to do it. Olive wood bottles are just a start. New designs, innovative ideas and a wide range of applications are the recipe to highlight the wealth we have in our hands.
